# RegionInspektion – skala / data i forskellig opløsning

# Dronedata med målinger på flere bånd

# Opret gitter – 10\*10 meter celler

Screenshot of MapInfo Pro showing the "Opret gitter" (Create Grid) dialog box over an orthophoto of agricultural fields.

The dialog box settings are:

- Objekttyper: Lukkede regioner (Selected)
- Objektstil: Regioner (Selected)
- Dækker:
  - Nord: 90 degrees
  - Syd: -90 degrees
  - Øst: 180 degrees
  - Vest: -180 degrees
- Afrundede: Checked
- Vælg område fra kort: Checked
- Mellemrum mellem linjer: 10 meter (highlighted with a red box)
- Jævnhed: 0 ekstra knudepunkter pr. kant

The right side of the screen shows the "Værktøj" (Tools) ribbon with the "Opret gitter" tool selected.

FØDEVARER

# 1. Forsøg MapInfo Advanced Rasteroperationer – klip

The screenshot shows the MapInfo Pro interface with several windows open, demonstrating advanced raster operations.

**Top Menu:** PRO, START, TABEL, KORT, SPATIAL, LAYOUT, RASTER, DISCOVER, PROJECT, IMAGES, ANALYSIS, MODIFY, QUERY, DRILLHOLES, DISCOVER 3D, GPS, SURFACES, GAMMEL.

**Left Sidebar:** Stifinder, Kort, Indhold, Indstilling.

**Main Window:** \*Untitled.wor - MapInfo Pro. It contains two map views:

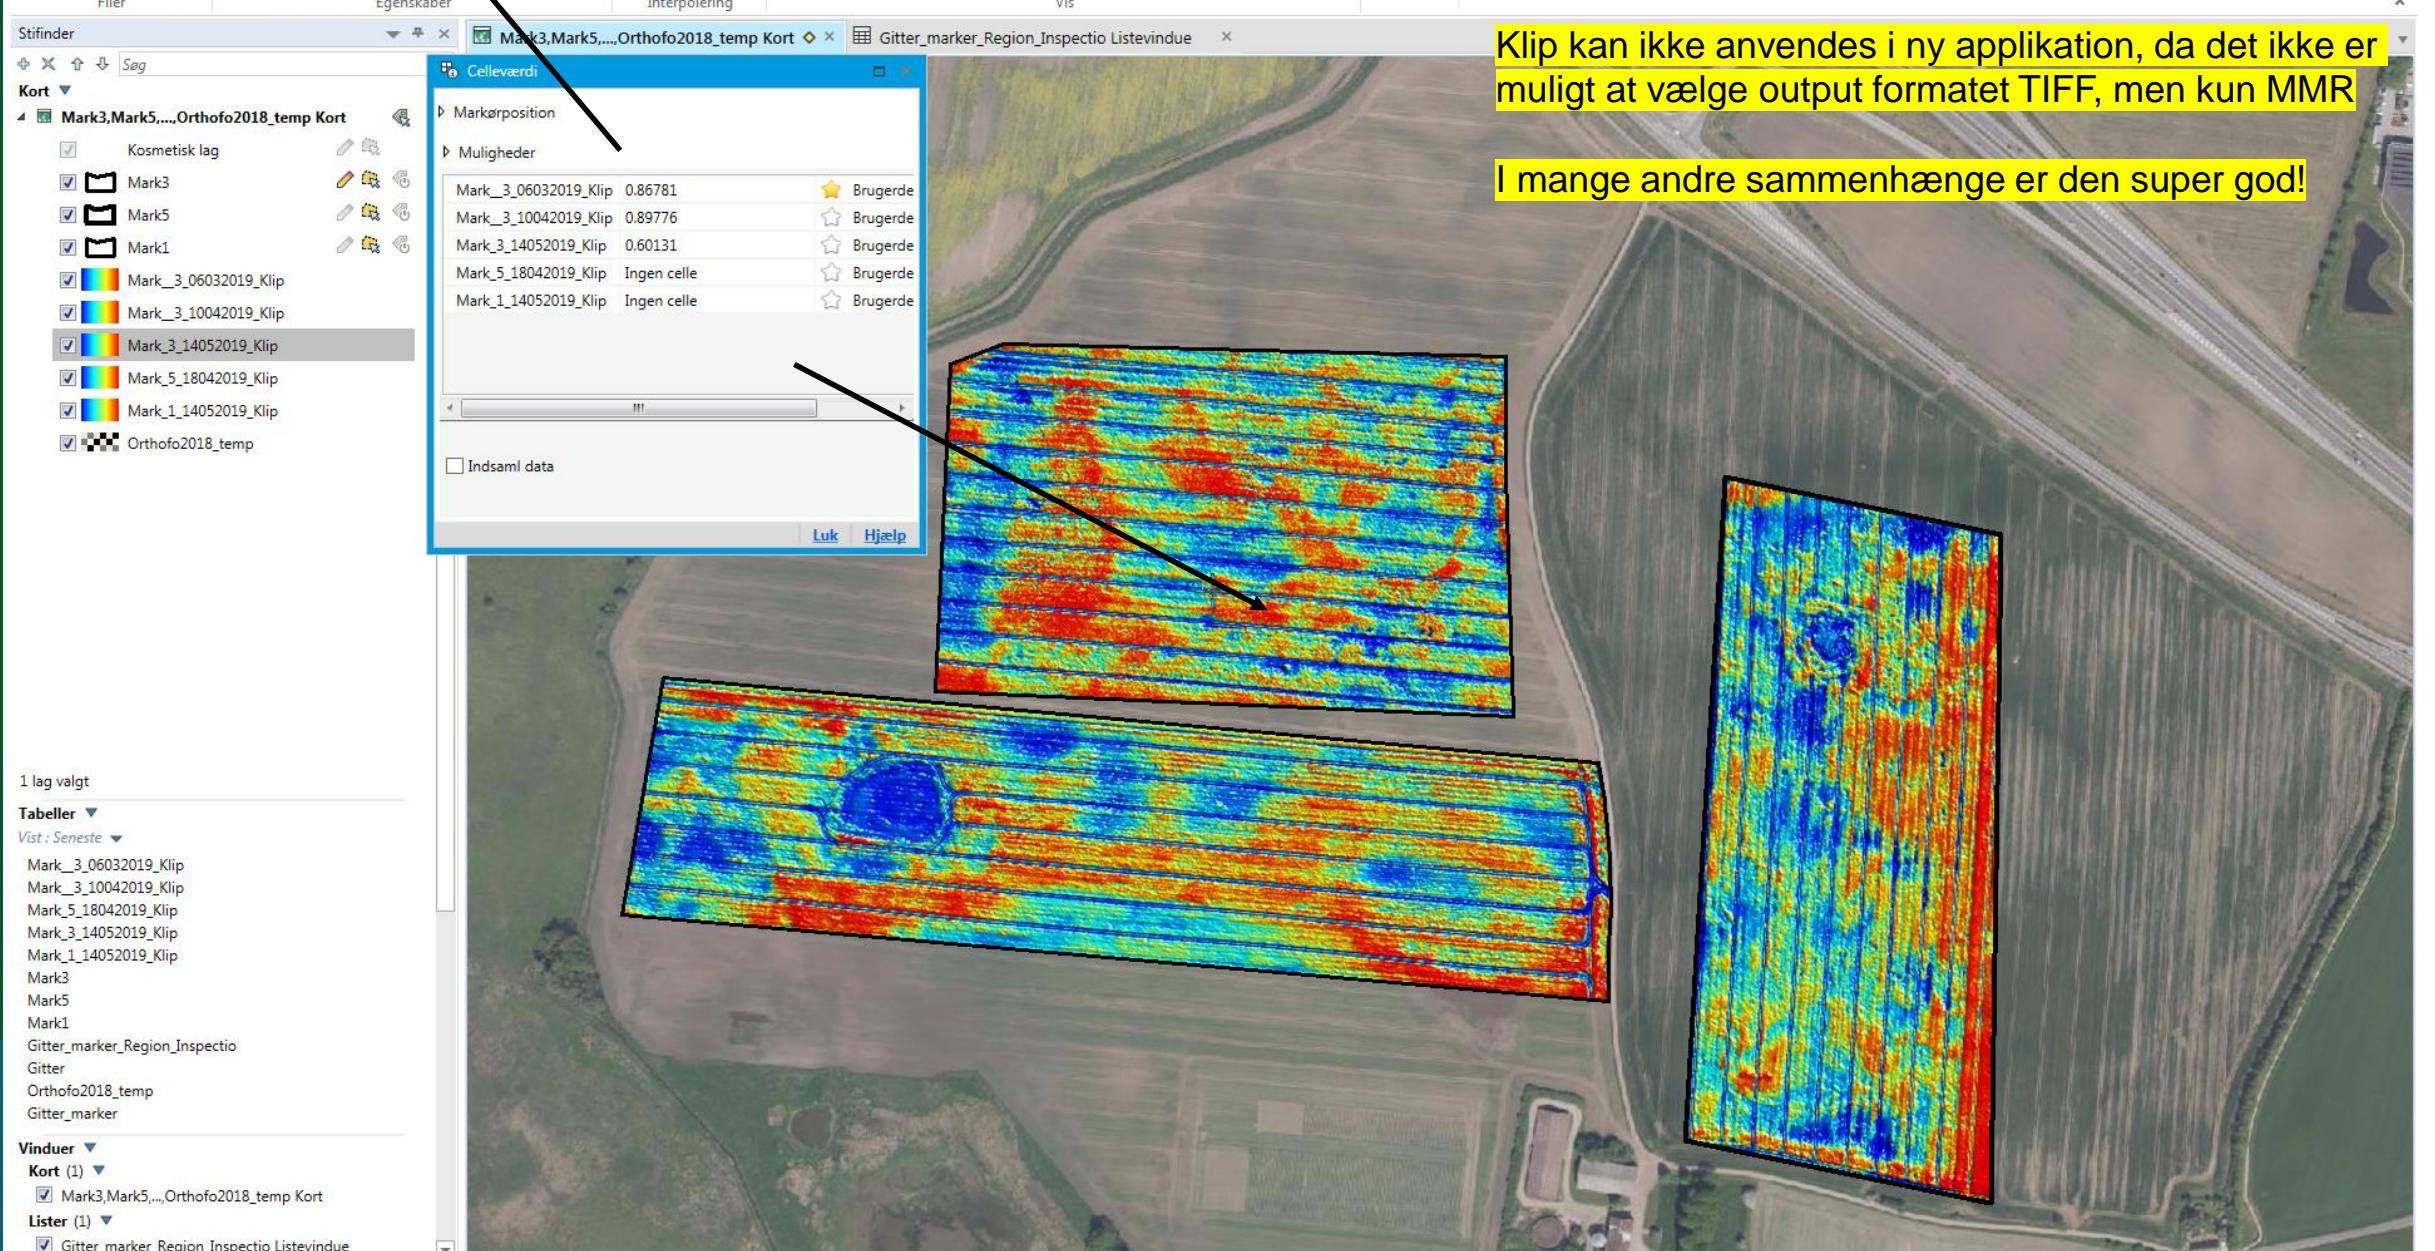

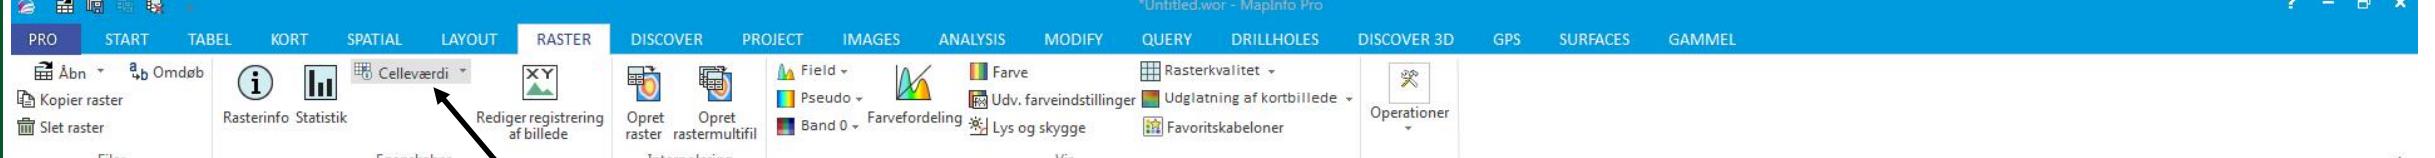

- Top Map View:** Shows a 3D surface model with a color gradient from blue to red. A black rectangular polygon is overlaid on the surface, representing the "Region (Polygon)" for clipping.
- Bottom Map View:** Shows the same 3D surface model with a black rectangular polygon overlaid, indicating the clipped area.

**Right Panel:** Klip (Clip) dialog box showing the configuration for the operation:

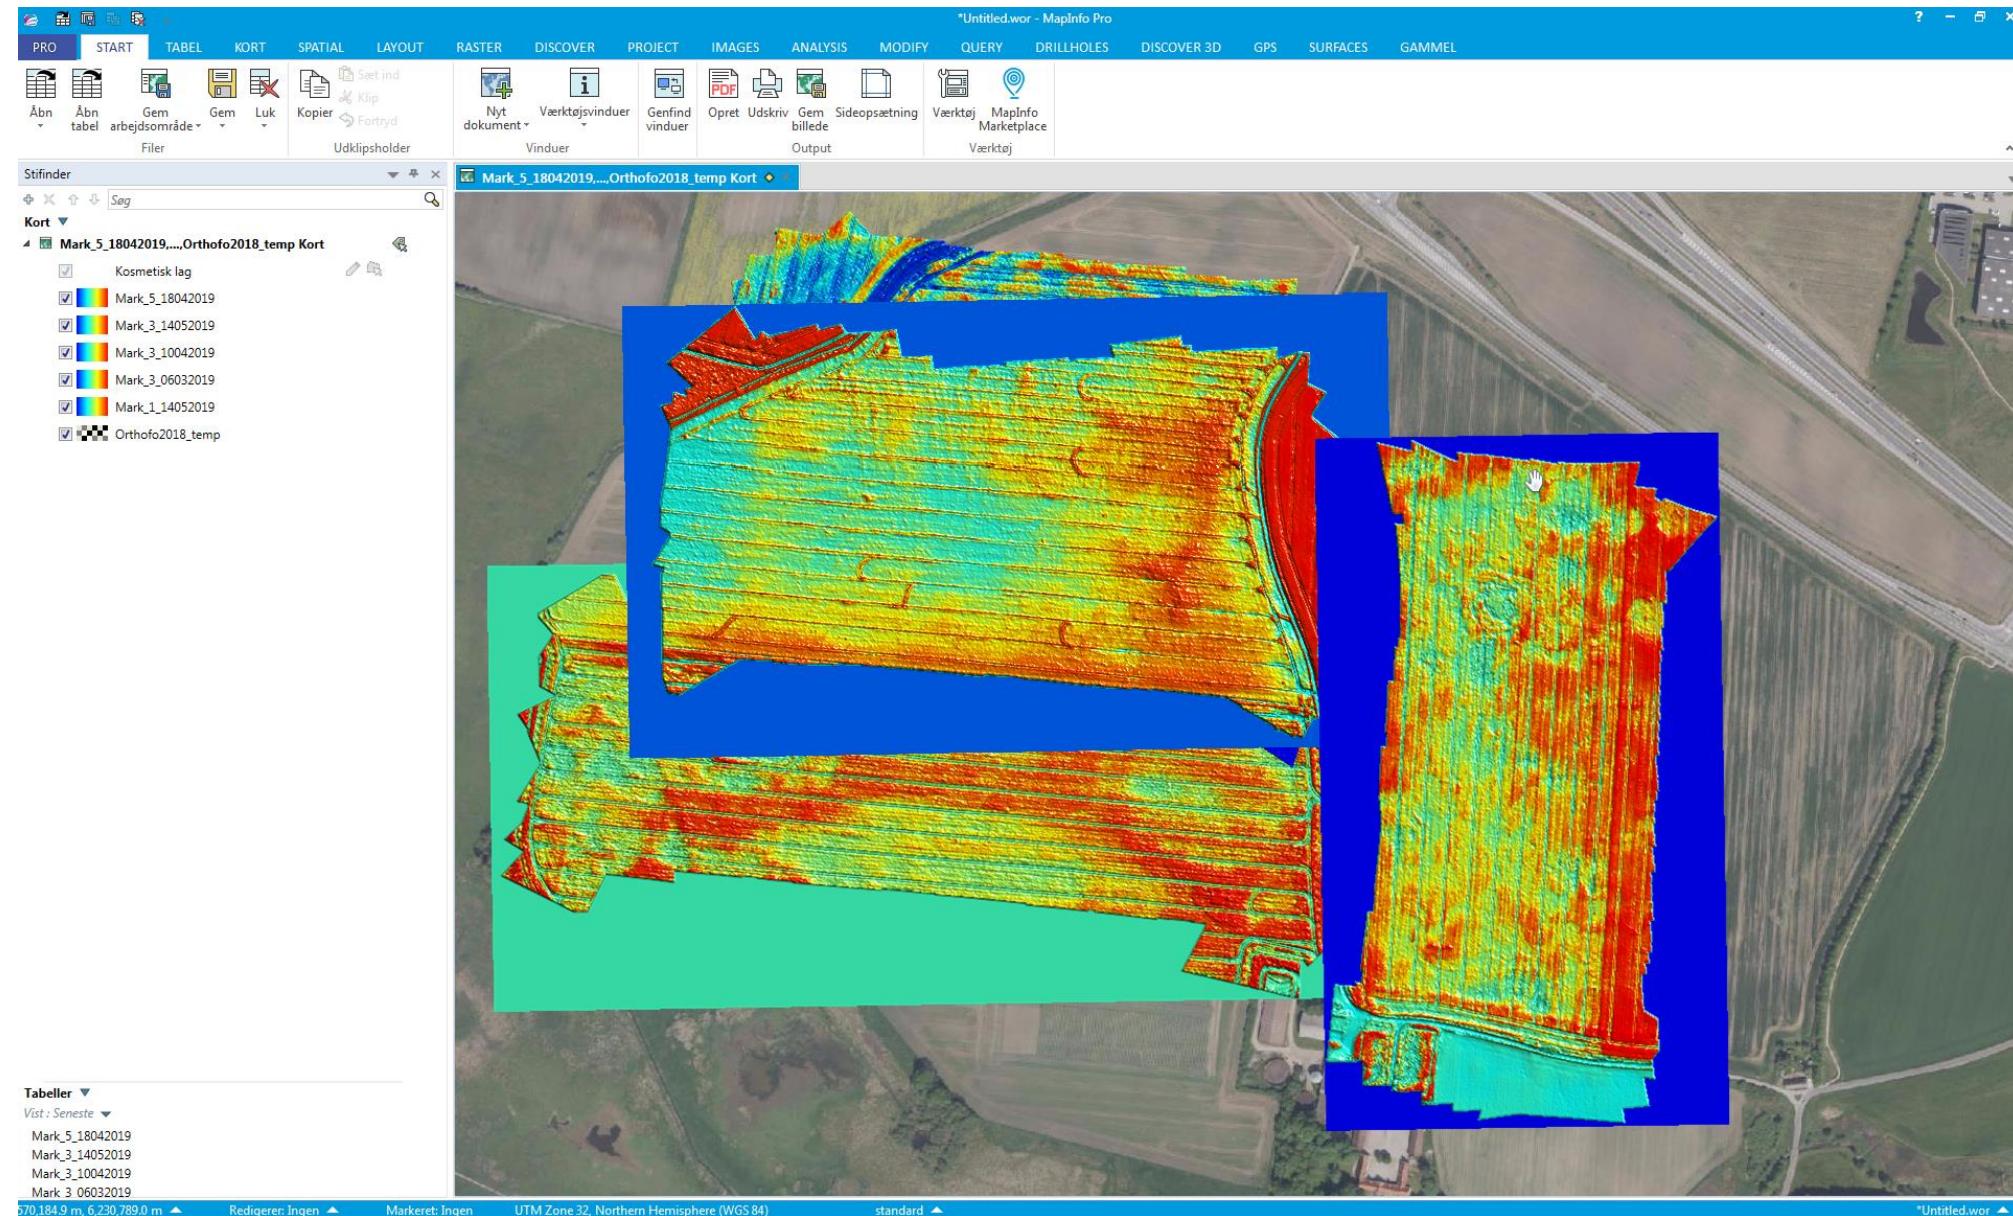

- Input:** Inputfil: Mark\_3\_14052019, Vælg felter, bånd: Alle felter alle bånd.
- Indstiller for klip:** Handling: Bibehold inden for, Udklipsområde: Region (Polygon), Polygon: Mark3.
- Output:** Outputfil: Mark\_3\_14052019\_Klip, Output-indstiller.

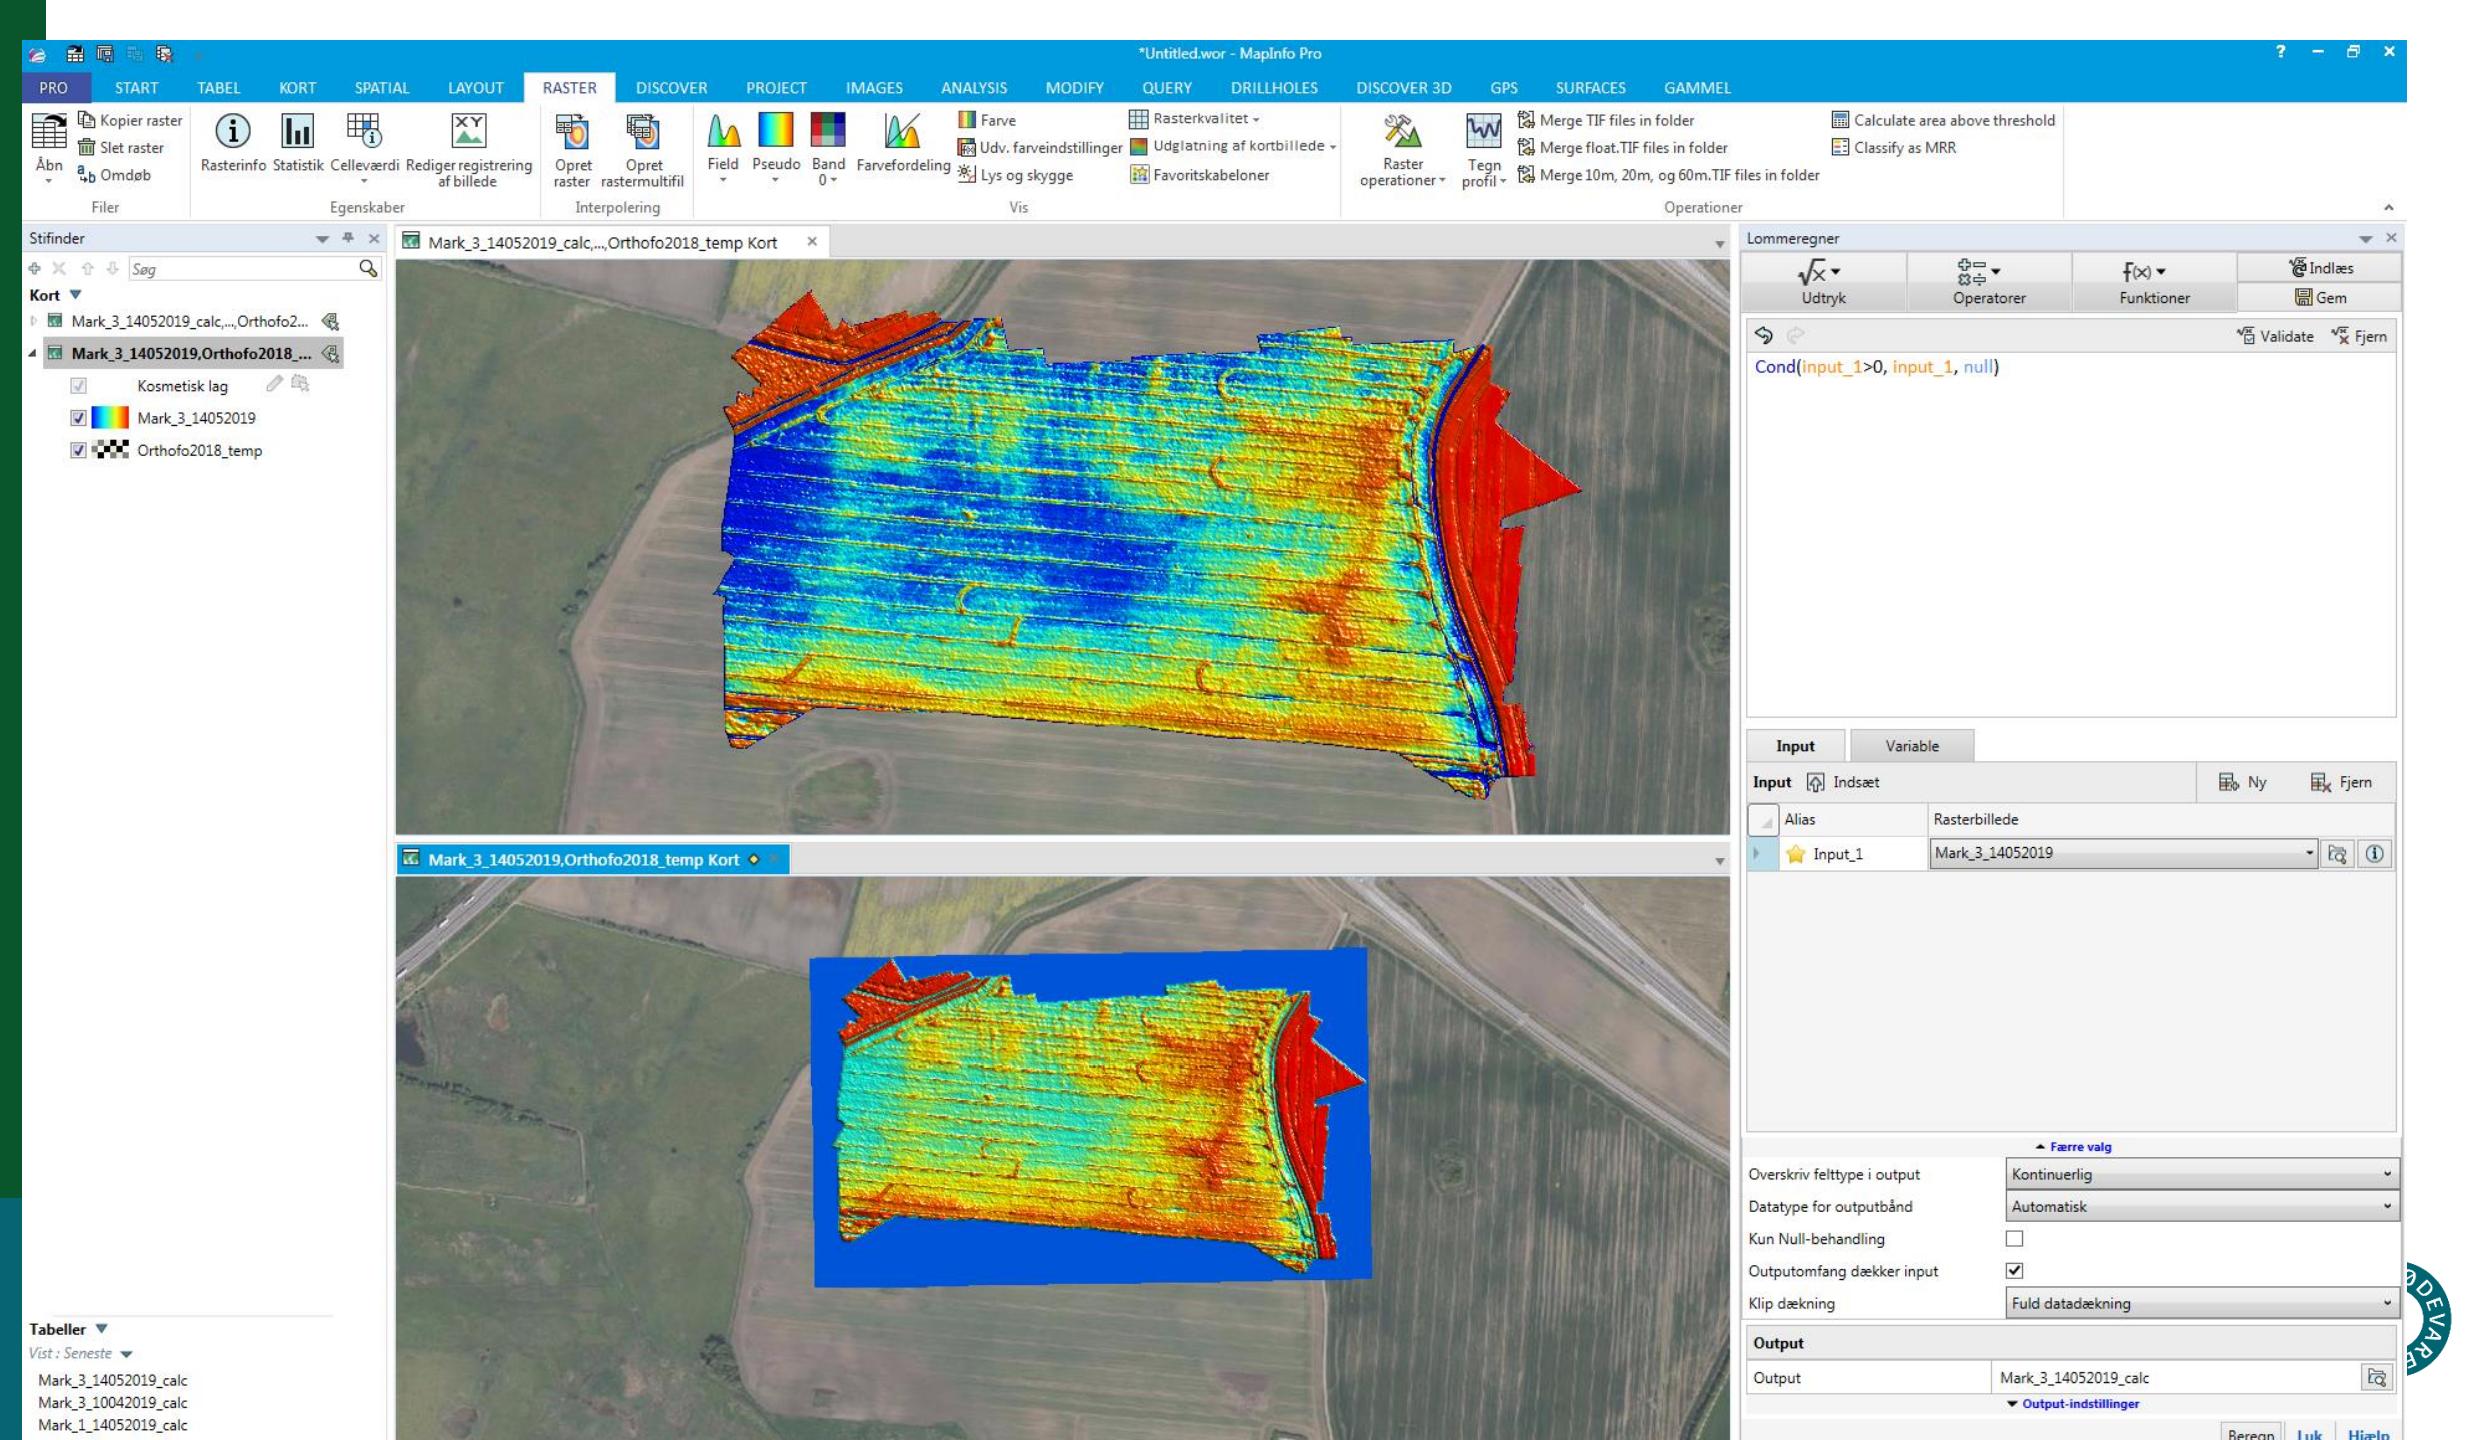

**Bottom Right Panel:** Raster operationer (Raster Operations) ribbon showing various processing tools:

- Alle:** Processering, Konverter, Klip (highlighted), Juster, Analyse, Punktinspektion, Lommeregner, Synsfelt, Sigtelinje, Volumen, Resample, Sammensæt, Kombiner, Reprojektion, Rasterisering, Linjestatistik, Kontur, Polygonering, Tverrsnit, Klassificer, Overflade.
- Others:** Merge TIF files in folder, Merge float.TIF files in folder, Merge 10m, 20m, og 60m.TIF files in folder, Merge TIF files in folder, Merge TIF files in folder.

## 2. forsøg – denne gang med lommeregner fjern alle værdier <0
