Create new Task list, TL, and Maintenance plan, MP

End user provide selected
data via excel shhet
Funct loc
Equipment
Components

End user check whether the
data exist in SAP via
Winshuttle query scripts
(chained)

Super user fill in the rest in the
main load sheets and run load
scripts for TL and MP (chained)

If the data exist in SAP (and thus returned to query
sheet), they will be copied to the main load sheets

Excel work book with several sheets for the involved scripts
