Patch Notes

Version: 9.6

Table of Contents

Patch Contents

These patch release notes describe changes made to Infogix Platform® Release 9.6, build 9.6-15462.

This patch addresses the following software defect(s):

Note: These fixes are applicable for WildFly deployments only.

Issue Number	Details
IP-7487	**Defect:** Fixed an issue where security configuration failed to map roles when multiple products are deployed to the same JVM.

This patch is applicable for the following products:

☒ Assure DQ®   ☒ Insight®

☒ ER®   ☒ Perceive®

How to Install the Patch

Installation Preparation

Note: In the instructions below,

`<product>` represents the Infogix application.

- For Assure DQ®, use IA.
- For ER®, use ER.
- For Insight®, use II.
- For Perceive®, use IV.

`<myConfigName>` represents the name of your configuration.

- If you accepted the configuration name `default`, you do not have to add the `-c < myConfigName>` parameter.

Server Installation

The zip file IPS-9.6-15462-1.zip contains everything you need to install this patch on the server.

1. Copy the zip file to the following folder:

   `<install_folder>/Infogix/maintenance/updates`

   If the server is on the UNIX® or Linux® platform, upload or FTP the zip file to the UNIX or Linux host in binary mode.

2. From `<install_folder>/Infogix /bin`, run the appropriate script:

   for Windows®

   `update-product.bat -c <myConfigName> apply IPS-9.6-15462-1 <product>`

   for UNIX or Linux

   `./update-product.sh -c <myConfigName> apply IPS-9.6-15462-1 <product>`

   Note: You do not have to apply this patch to each product separately. Applying the patch one time applies it to the platform for all the product configurations created within the installation directory.
   You will, however, must run the `clean` and `deploy` scripts for each product.

3. If this is a new installation and you have not yet run the deploy script, skip the remaining steps, and return to the installation process.

4. From `<install_folder>/Infogix /bin`, run the appropriate script:

   for Windows®

   ```
   clean.bat <product>
   ```

   for UNIX or Linux

   ```
   ./clean.sh <product>
   ```

5. From `<install_folder>/Infogix /bin`, run the appropriate script:

   for Windows®

   ```
   deploy.bat <product>
   ```

   for UNIX or Linux

   ```
   ./deploy.sh <product>
   ```

6. Restart the Infogix product server(s).

Contact Us

If you encounter any technical issues, we recommend that you visit the support portal at support.infogix.com.

If your query has not been discussed previously, you can create a new topic and receive answers from our product experts.

Alternatively, you can log a support ticket:

1. Select **Sign in** from the top right corner of the screen.

2. If you have already registered, enter your **Email** and **Password**, then click the **Sign in** button. Or, if you are not a registered support portal user, click **Sign up.**

3. Once you have registered and signed in, select **Submit a request** from the top right corner of the screen.

4. Complete all fields, then click **Submit** at the bottom of the screen.

Community

Our product is constantly evolving and input from you is highly valued. If you have any suggestions, please contact the product team by submitting a feature request on the Community.
