

Change in Java support for Spectrum™ Technology Platform and Spectrum™ Spatial Analyst

Dear Valued Spectrum™ Technology Platform and Spectrum™ Spatial Analyst Customers:

Oracle Corporation has announced an end to free public updates for corporate clients of Java 8, starting February 1, 2019. You can review the Oracle Corporation policy and Java support roadmap [online](#).

Pitney Bowes currently redistributes Java 8 with Spectrum Technology Platform and Spectrum Spatial Analyst. Because of this change in policy from Oracle, Pitney Bowes will no longer bundle Java with Spectrum Technology Platform and Spectrum Spatial Analyst going forward, for future releases. We anticipate Spectrum Technology Platform and Spectrum Spatial Analyst will remain on Java 8 for the next release, at a minimum. As a result:

- Customers must provide the Java JDK for all future releases.
- For now, Pitney Bowes will continue to develop and test with Java 8 as specified in our release documentation for upcoming releases.

Here is what you need to know

- **There are no changes required for AIX customers.** This change effects all other supported platforms for Spectrum Technology Platform and Spectrum Spatial Analyst.
- The installation process for both products going forward will be changing to require the presence of a Java JDK to be installed before product installation can proceed.

Supported Java Distributions

The following table shows Pitney Bowes tested and verified Java distributions at this time.

Operating System	Vendor-supplied	Azul	Oracle
AIX	✓		
CentOS		✓	✓
HP-UX	✓		
Oracle Linux		✓	✓
Red Hat Enterprise Linux		✓	✓
Solaris		✓	✓
SUSE Enterprise Linux Server		✓	✓
Ubuntu		✓	✓
Windows Server		✓	✓

Need help? Need to find a solution? We have great news: You can now use your favorite search engine to locate FAQs, how-to guides, and other helpful articles from the **Pitney Bowes Knowledge Base**.

Sincerely,
 Navin Sharma
 Vice President, Product Management - Customer Information Management
