# 1. New in - 8.2.3

This document describes the enhancements and modifications included in the latest release of Data360 DQ+, and highlights any changes that may affect your current implementation.

For information on previous releases, and for end user and administration topics, please see the integrated product help. You can access the help by clicking the Help icon in the corner of the screen:

**Note:** This release applies to both enterprise & cloud versions of the product.

## 1.1 Other Changes

- Replaced simple progress indicator with a popup which shows phases of CSV or Excel file export to make it resilient to timeouts.
- Provided ability to export sample data in CSV and Excel formats.

## 1.2 Corrected issues

Issue Summary	Issue Number
Fixed an issue where an error during "Use traditional folder structure" processing was reflected as the failure of the Analysis containing the output data store where it was used, and the appearance that a process model running that analysis was still running when it was not.	ISX-11738
Fixed an issue where Execution Details node counts may be incomplete for the final snapshot of output counts for an analysis with many nodes. This problem has only been observed in Azure installations.	ISX-11673

## 2. Fix pack installation - Enterprise only

**Note:** Fix packs are pushed to the cloud version of Data360 DQ+ automatically. The following steps only apply to the enterprise edition of the product.

To install this fix pack on the enterprise edition of Data360 DQ+:

1. Download the fix pack into the `/tmp` folder.
2. Give execute permission to the downloaded fix pack, for example:

```
chmod 777 dqplus_IS-8.2-202211230159-3-fixpack.sh
```

3. Extract the downloaded fix pack by running its name as a command, for example:

```
./dqplus_IS-8.2-202211230159-3-fixpack.sh
```

Extracting a fix pack for the first time will create a directory at:

```
/opt/infogix/dqplus-8.2/maintenance
```

4. Execute the `./apply-patch` command from within `/opt/infogix/dqplus-8.2/maintenance/dqplus_IS-8.2-202211230159-3-fixpack/bin`.

To verify that the fix pack has been applied, navigate to the **Help** menu in the product and select **About**. The product's Updates information should be updated.

### 2.1 Reverting the fix pack

- Execute the `./revert-patch` command from within `/opt/infogix/dqplus-8.2/maintenance/dqplus_IS-8.2-202211230159-3-fixpack/bin`

## 3. Contact us

If you encounter any technical issues, we recommend that you visit the support portal at [support.precisely.com](https://support.precisely.com).

### Community

Our product is constantly evolving and input from you is highly valued. If you have any suggestions, please contact the product team by submitting a feature request on the [Community](#).
