# 1. Latest release

This document describes the enhancements and modifications included in the latest release of Data360 Govern, and highlights any changes that may affect your current implementation.

For information on previous releases, and for user and administration topics, please see the integrated product help. You can access the help by clicking the Help icon, positioned towards the right of the header bar.

## 1.1 What's new

### Ownership rule filters

When setting conditions on ownership rules, you can now filter simple text fields at a more granular level by choosing from a list of operators, for example:

"Field <field name> *contains* <value>"

"Field <field name> *starts with* <value>"

The list of operators is only available for simple text fields. There is no change in functionality for existing simple text field filters, these now use the **is** operator.

When setting a Relationship filter, you can choose from two operators: **in** and **not in**.

For more information, see the "Establishing responsibilities" topic in the help.

### Partial search index rebuild

You now have the option to select specific asset types or categories for which you want to rebuild the search index, rather than running a complete rebuild of the search index. This can be useful because a complete rebuild of the search index can take a significant amount of time to complete in environments with a large amount of data.

A rebuild of the search index is required when data has been added from outside of the application, or if you change the configuration of an asset type that alters or removes data on existing assets.

For more information, see the "Customizing the application" topic in the help.

## User interface improvements

The display of column headings in asset list grids has been improved, and you can now resize the side panel as needed on list grid pages, asset detail pages, the global search page and tag, user and group administration pages.

Previously when resizing a grid, column headings wrapped inconsistently. Now, column headings are fixed at the top of the table when you scroll and the column heading text is displayed on one line rather than wrapping. If you view the grid on a smaller screen, or if you expand the side panel, list grids will now scroll horizontally when necessary and the menu button will remain visible on the right edge of the grid. Administrators can override the new behavior by setting a column width (pixels) for a column.

## Side panel in dialogs

You can now view the side panel from the **Create New Asset** and **Edit Asset** dialogs, showing detailed information about asset paths, reference lists and relationship fields.

## Performance improvements

Performance improvements have been made across the application, in particular to Lineage Diagrams.

## Other changes

The menu button in asset list grids now contains a **View Information** option.

# 1.2 Corrected issues

Issue summary	Issue number
Fixed an issue that caused the sample column list to timeout when choosing a bulk load template.	GOV-19319
Fixed an issue that prevented the labels on the login form from displaying in a color appropriate to the background.	GOV-19314
Fixed an issue on the <b>Reference Lists</b> page that prevented you from being able to go back to the list of reference lists after clicking the <b>Responsibilities</b> tab.	GOV-19279

Issue summary	Issue number
Fixed an issue that prevented assets from remaining selected on the <b>Add Relationships</b> dialog when navigating to the next assets page.	GOV-19237
Fixed an issue that caused duplicate entries on the <b>Models</b> list page.	GOV-19115
Fixed an issue that in some cases caused default values to be sorted as NULL.	GOV-19066
Fixed a layout issue on the process diagram <b>Relationships</b> dialog.	GOV-19052
Fixed an issue in the <b>Add Relationships</b> dialog that prevented list fields with color from wrapping correctly when selecting a list field value.	GOV-19359
Fixed an issue that caused the application to timeout when loading a list of child assets on the <b>Children</b> tab.	GOV-19336
Fixed an issue that caused the <b>Save Changes</b> button to remain disabled when editing default folders.	GOV-19222
Fixed an issue on the <b>Diagrams</b> tab that prevented the diagram type from being displayed by default in the dropdown list.	GOV-18728
Fixed an issue where the dropdown list on parent models and policies was missing the last option.	GOV-19419
Fixed an issue that prevented list field values from being populated on ownership rule <b>When</b> and <b>Then</b> filters.	GOV-19396
Fixed an issue that caused the <b>Activity</b> tile on the home page to show activity for assets that were not relevant to the user's permission level.	GOV-18983
Fixed an issue that caused duplicate <b>Responsibilities</b> tabs to appear on the user profile page for non admin users.	GOV-19389
Fixed an issue that prevented search results from being displayed correctly when using the search bar in a dropdown list.	GOV-19438
Fixed an issue that caused responsibility badges to be displayed on lineage diagrams even when <b>Visible?</b> was not checked for the ownership rule.	GOV-19425
